## SIGNATURE COCKTAILS WITH RUM | Rs 325

Rum is a distilled alcoholic drink made from sugarcane byproducts, such as molasses, or directly from sugarcane juice, by a process of fermentation and distillation. The distillate, a clear liquid, is then usually aged in oak barrels.

Mauritius' rum history somehow started in 1639, when the Dutch settlers first introduced sugarcane plant on our island... Today, we would like to bring you our finest rum cocktails concocted by our barman!
